DETAILED ACTION

Response to Amendments/Arguments

Applicant's arguments filed February 28, 2006 have been fully considered but they are not persuasive. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Applicants argue that the primary reference Ferrari, et al., does not disclose polyalkylenepolyamine and the secondary reference of Hahnle, et al., do not disclose polyarylenepolyamine. It should be noted the applicant's elected species is polyalkylenepolyamine and not polyarylenepolyamine. Applicants also argue that Hahnle, et al., reference does not disclose the polyalkylenepolyamine are used with polypeptides. Hahnle, teaches the use of polymers containing primary and secondary amine groups having a molecular weight of not less than 300 (column 3, lines 3-6 and column 4, lines 41-44).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Ferrari, et al., reference clearly have shown the use of copolymers of Arg-Gly-Asp and Gly-Ala- Gly-Ala-Gly-Ser deposited onto substrates and films and membranes that could be

used for wound dressing and Hahnle, et al., reference discloses the use of polyalkylenepolyamine matrix containing primary and secondary amine groups having a molecular weight of not less than 300 that could be used for wound dressing applications. Therefore, it would be obvious to one skilled in the art at the time the invention was made to combine the teachings of the two references to produce a wound-dressing matrix.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
